SUMMARY

Bachelor of Science in Computer Science specializing in Intelligence Systems with hands-on experience building machine learning and deep learning models for real-world applications. Proficient in Python, PyTorch, scikit-learn, SQL, and R, with experience in end-to-end ML pipelines, statistical modeling, and experiment design. Brings a hypothesis-driven approach to data science work and collaborates well across technical and operational teams.

EXPERIENCE

LogIX · June 2023 – Present

Machine Learning Projects

- Trained and fine-tuned a transformer-based OCR model that reached 86% character accuracy, cutting manual data entry time by an estimated 50% for digital document processing.
- Built an end-to-end ML pipeline covering data preparation, model training, and model evaluation using PyTorch.

Shroomseek · June 2023 – Present

Machine Learning Projects

- Developed a Streamlit image classification application using ResNet18, reaching 74% test accuracy across roughly 15,000 images and 169 classes.
- Structured large image datasets through feature extraction and preprocessing workflows to support training and inference.

Cryptone · June 2023 – Present

Machine Learning Projects

- Built a hybrid ARIMA-LSTM model to predict cryptocurrency prices for BTC, ETH, and XRP, achieving MAPE of 1.30% on BTC, 2.09% on ETH, and 1.94% on XRP.
- Designed experiments to test the impact of sentiment features on prediction accuracy and refined the model based on performance feedback.

Stock & Index Price Analysis · June 2023 – Present

Machine Learning Projects

- Analyzed stock price movements and causal relationships using Granger causality tests and statistical modeling in RStudio.
- Processed and structured financial time-series data to support hypothesis-driven analysis.

Ninja Van Philippines · Jun 2025 – Aug 2025

Resource Management Support Intern

- Validated and onboarded about 1,000 courier accounts while managing weekly operational holds and reporting updates to keep team workflows aligned.
- Built an internal Google Sites dashboard that consolidated forms, support links, and team resources to simplify day-to-day operations.
- Performed data validation and cleaning on operational records using Google Sheets and account management systems, improving data quality for downstream analysis.

SKILLS

Machine Learning & AI: PyTorch, scikit-learn, Transformers, ResNet18, ARIMA-LSTM, image classification, OpenCV, sentiment analysis, model fine-tuning, Programming Languages: Python, SQL, R, HTML, CSS, TypeScript, Data Processing & Analysis: Pandas, NumPy, Microsoft Excel, data validation, feature engineering, time-series analysis, Granger causality testing, Data Pipeline & Deployment: model training workflows, Streamlit, end-to-end ML pipeline development, Tools & Platforms: Git version control, Kaggle API, RStudio, Google Sheets, Google Sites, Collaboration & Soft Skills: cross-functional teamwork, attention to detail, analytical thinking, time management, clear communication of technical concepts

EDUCATION

De La Salle University-Dasmariñas · Dasmariñas, Philippines · Aug 2022 – Aug 2026

Bachelor of Science (BS) in Computer Science

- Specialization: Intelligence Systems
- Last Semester GPA: 3.54 / 4.00
- Expected Graduation: Aug 4, 2026

De La Salle University-Dasmariñas · Dasmariñas, Philippines · Aug 2021 – Jun 2022

Accountancy, Business and Management (ABM) | High Honors (Grade 12, Final GPA: 98)
