Apt Blk 515 Woodlands Drive 14 #02-143 Singapore 730515

SUMMARY

A Bachelor of Science in Computer Science specializing in Intelligence Systems, with a strong foundation in Python, SQL, R, and machine learning libraries like PyTorch and Scikit-learn. Possesses practical experience in data analysis, AI agents, and machine learning model development. Eager to apply analytical skills and passion for AI advancements to contribute to innovative projects and drive impactful solutions.

EDUCATION

Bachelor of Science in Computer Science | Aug 2022 - Aug 2026

De La Salle University-Dasmarias

- Last Semester GPA: 3.54 / 4.00
- Expected Graduation: (Aug 4th, 2026)

Accountancy, Business and Management (ABM) | Aug 2021 - June 2022

De La Salle University-Dasmarias

- Achieved High Honors (Grade 12)
- Final GPA: 98

EXPERIENCE

Ninja Van Philippines: Resource Management Support Intern | Jun 2025 - Aug 2025

- Validated and onboarded ~1,000 courier accounts, managing weekly holds due to invalid PODs and reporting data updates to the team lead.
- Built an internal Google Sites dashboard consolidating team resources (forms, support links) to streamline daily operations.
- Performed data validation and cleaning on operational records for ~1,000 courier accounts using Google Sheets and an internal account management system.

Machine Learning Projects | June 2023 - Present

- **LogIX:** trained and fine-tuned a Transformers-based OCR (TrOCR) achieving 86% character accuracy for a digital purchase log book system reducing manual data entry time of CMC Lighting De Arte Inc. by an estimated 50%.
- **Shroomseek:** Streamlit-based image classification application utilizing ResNet18 image classifier achieving 74% test accuracy on ~15,000 images and 169 mushroom classes.
- **Cryptone:** Developed a hybrid ARIMA-LSTM model to predict BTC, ETH and XRP prices influenced by emotion tagging and sentiment score achieving a MAPE of 1.30% on BTC, 2.09% on ETH, and 1.94% on XRP.
- **Stock & Index Price Analysis:** Assessed stock price movements and analyzed their causal relationships using Granger causality tests in RStudio.

SKILLS

- Programming: Python, SQL, R, HTML, CSS, Tailwind CSS, React.js, Typescript
- Data Analysis & Manipulation: Pandas, NumPy, Microsoft Excel
- Machine Learning: Pytorch, Scikit-learn, Transformers, Kaggle API
- Time Management
- Collaboration: Git Version Control, collaborative with teams
- Attention to detail

CERTIFICATIONS

- SQL Essential Training Certification (LinkedIn)
- Statistics Foundations 1, 2, 3 Certifications (LinkedIn)
- Programming for Beginners with Python Certification (DICT)
- Introduction to IoT (Cisco), Introduction to Data Science (Cisco)
